

TRANSMITTERS, BLOCK CODED

Handheld Transmitters Models MT-1B and MT-2B

- **Compatible with all Linear access receivers and controllers.**
- **Factory block coded to one of over 1,000,000 ID codes.**
- **Factory block coded to one of 15 facility codes.**
- **Single-channel MT-1B or two-channel MT-2B.**
- **Supplied with visor mounting clip.**

Linear's MT-1B and MT-2B offer a cost effective means of incorporating the security and convenience of block coded transmitters into nearly any access control application. Both models are sequentially precoded at the factory with unique ID codes, as well as facility codes. This coding combination represents the same level of security as a traditional Wiegand card.

MT series transmitters are housed in the most popular access control transmitter housing and can be recognized by their distinctive button color. A metal clip is supplied for easy mounting on a car sun visor. The MT-1B is a single-channel model used where only one remote control function is needed, such as an entrance gate that utilizes a free exit loop. The MT-2B is a two-channel model that sends a unique signal from either of its two buttons. It is ideal for applications that require access control for both entry and exit, as well as when a secondary remote control function is needed, such as gate access or garage access.

Programming MT series transmitters into system memory is as simple as entering the first and last number of the coding block into the controller. Depending upon which type of controller, transmitters can be enrolled either by user-friendly programming software or manually at the controller keypad.

General Specifications

Dimensions: 2.20 in W x 3.80 in H x .90 in D (55.88 x 96.5 x 22.9 mm)

Models: MT-1B, one channel; MT-2B, two channels

Power: one 9 V battery (supplied)

Frequency: 318 MHz

Number of Codes: 1,000,000 plus ID codes, 15 facility codes

Code Set Method: factory programmed

Accessories: screw mount visor clip (supplied)

Compatible Controllers:

AM/II

AE-1 Telephone Entry

AE-2 Telephone Entry

AM-WOR Radio Reader

AKR-1 AccessKey with Radio
